Lesson 15: A Synthesis of Representations of Equivalent Ratio Collections

Exit Ticket

Jen and Nikki are making bracelets to sell at the local market. They determined that each bracelet would have eight beads and two charms.

Complete the table below to show the ratio of the number of charms to the number of beads.

Charms	2	4	6	8	10
Beads	8				

Create ordered pairs from the table and plot the pairs on the graph below. Label the axes of the graph and provide a title.
